Security and firewall ●●●●●

Profile

I'm a motivated IT professional with a strong foundation in IT support and software development. I recently graduated cum laude (May 2025) with a Diploma in Information Technology, specializing in Software Development, from Belgium iTversity Campus.

My background includes hands-on experience as an IT Technician, Full stack developer, providing support in hardware, software, networks, C#, SQL, javascript, reactjs and cloud-based environments like Microsoft 365. I'm passionate about solving technical problems, whether it's helping users troubleshoot issues or building efficient, user-friendly software solutions. I have experience using Microsoft Teams (with subtitles) to support users effectively, and I bring strong communication skills, especially in diverse and inclusive environments.

As a deaf professional who can speak and hear a little (with a hearing aid), I offer a unique perspective, adaptability, and a strong commitment to accessibility and user-centered design. My education and practical experience have taught me to work across the stack—from front-end to back-end development while staying grounded in real-world IT support needs.

Experience

IT Support Technician

Apr 2024 - Mar 2025

[First National bank internship, Johannesburg](#)

I am primarily motivated by the opportunity to solve problems and make a positive impact. As an IT Support Technician, I find great satisfaction in helping users resolve their technical issues and improve their overall experience with technology. The challenge of diagnosing and troubleshooting problems pushes me to think critically and continuously develop my skills.

My responsibilities: Azure Active directory, Server Virtualisation, LAN, networking & wifi Infrastructure, Troubleshoot, Windows Server, proxy server, Exchange server, Application Support, SNOW, DHCP, DNS, Microsoft Office 365, Security and Firewall, software application, and HP & Dell hardware, cisco jabber, power bi desktop and communicate with the user by using teams without calls that would be best for deaf people and more.

IT Support and Full slack developer

Aug 2025 - Nov 2025

[Capaciti leanership, Johannesburg](#)

Currently enrolled in a structured IT learnership program with a focus on Artificial Intelligence (AI), IT Support, and Full Stack Development. The program equips me with:

- **AI Foundations:** Understanding machine learning concepts, data analysis, and practical applications of AI.
- **IT Support:** Hands-on experience in troubleshooting hardware/software issues, end-user support, and working with collaboration tools such as Microsoft Teams.
- **Full Stack Development:** Building web applications using front-end (HTML, CSS, JavaScript) and back-end technologies, including databases and APIs, to create complete, functional solutions.

Qualities

- Problem-solving
- Teamwork
- Communication
- Adaptability
- Time management

Test Analyst

Nov 2025 - Present

[First National Bank, Johannesburg](#)

Conduct manual and automated testing for the FNB Sign Language mobile application, used in FNB branches to support communication with Deaf customers.

Perform testing on the FNB AID application using iPad devices to ensure accurate sign language functionality and smooth user experience in branch environments.

Analyse business requirements and create detailed test cases, test scenarios, and test scripts for sign language features and workflows.

Work with Python scripts for testing support and data preparation during the development and testing process.

Use Label Studio to review, label, and manage sign language datasets used for training and improving the application.

Develop and review code using PyCharm to assist with testing automation and data validation.

Edit and prepare sign language video content using DaVinci Resolve to support the application's video-based communication features.

Identify, document, and track defects using FNB-approved tools and collaborate with developers and analysts to resolve issues.

Prepare test reports and communicate testing progress, results, and recommendations to the QA lead and project stakeholders.

Ensure all testing and development work complies with FNB standards, accessibility requirements, and security protocols.

Volunteer

Customer service

Dec 2015 - Present

[Selo events bussiness](#)

My mother runs an events business and during my holidays I go home to assist her in the events business. The activities include erecting tent structures, operating sound systems for the events. Recently I was responsible for setting up streaming services for some of the key events. I have a deep appreciation of customer service and the role of delighted customers.

Education

High School

Jan 2019 - Jun 2020

[Metro Deaf School, Minnestoa, United states](#)

I moved to Metro Deaf School when I was in grade 11, and I completed my matric there in 2020. It was such a great and important experience for me.

University

Jul 2021 - Dec 2023

[Belgium iTversity Campus, Pretoria, South AFRICA](#)

I studied at the Belgium iTversity Campus, where I earned a Diploma in

Front-End Software Engineering Job Simulation	Aug 2025
Customer Service Job Simulation	Aug 2025
Service Desk Job Simulation	Aug 2025
Technology Engineering Job Simulation	Aug 2025
Microsoft Azure Fundamentals: AZ-900	Aug 2025
Azure AI Fundamentals: AI-900	Aug 2025
Advanced Software Engineering Job Simulation	Aug 2025
ASP.NET Core Foundations	Aug 2025
